**WAV Smart Control™ and Smart Home Compatibility Reference**

WAV Smart Control™ devices use Zigbee 3.0 technology to turn LED Lighting products* into smart home connected lights.

*WAV Smart Receivers are compatible with two-wire lighting systems and four-wire RGB lighting systems.

Control LED Lighting with WAV Smart Control™ in three simple ways

**Wireless** – Use with our Uno, Duo, Quattro, RGB, or TandemLED™ wireless controller

**App** – Use a smart home hub app to control lights from anywhere in the world!

**Voice** – Connect to a compatible smart home hub and use voice control

WAV Smart Control™ Compatibility

Smart Home Speaker Hubs such as the Amazon Echo Plus 1st and 2nd Generation and Amazon Echo Show 2nd Generation have a built-in smart home hub to connect to the WAV Smart Control™ device right out of the box. Other Smart Home Devices need an additional Zigbee 3.0 enabled hub, such as a Philips Hue Bridge hub, to connect the WAV Smart Control™ device to your Smart Home Hub device.

Learn to set up your device with a Smart Home Hub at www.Vimeo.com/Channels/WAVSmartControl

Visit the Resources section of www.TaskLighting.com for more about the different ways you can control your lighting with the WAV Smart Control™ devices.
**Smart Home Speaker Hubs that directly connect with WAV Smart Control™ devices**

These are Smart Home Speakers with a built-in hub to allow for direct connection to the WAV device. Using a Smart Home Speaker Hub allows you to use voice command as well as smartphone app control.

- Amazon Alexa Show (2nd Generation)
- Amazon Alexa Echo Plus (1st Generation)
- Amazon Alexa Echo Plus (2nd Generation)

**Zigbee 3.0 enabled hubs that directly connect with WAV Smart Control™ devices** *(not a speaker device)*

These are hubs with built-in Zigbee 3.0 technology that connect with the WAV Smart Control™ devices and Smart Home Speakers to allow smartphone app control. Connecting one of these to a Smart Home Speaker will then give you voice control via the Smart Home Speaker.

- Philips Hue Bridge Hub (1st Generation)
- Philips Hue Bridge Hub (2nd Generation)
- Samsung SmartThings Hub

**Smart Home Speaker devices that need an additional Zigbee enabled hub to connect with WAV Smart Control™ devices** *(such as a Philips Hue Bridge easily purchased on Amazon)*

These are Smart Home Speakers that require an additional Zigbee 3.0 enabled Smart Home Hub to connect with the WAV Smart Control™ devices. When connected with a Zigbee 3.0 enabled device, these allow you to use voice commands as well as smartphone app control.

- Amazon Echo (1st Generation)
- Amazon Echo (2nd Generation)
- Amazon Echo (3rd Generation)
- Amazon Echo Dot (1st Generation)
- Amazon Echo Dot (2nd Generation)
- Amazon Echo Dot (3rd Generation)
- Amazon Echo Show 5
- Amazon Echo Show 8
- Apple HomePod
- Google Home Hub
- Google Home Mini Smart Speaker
- Google Home Smart Speaker
